Prepared March 1, 2026. The utility supply rates reflected herein are based on a modeled usage of 1,000 kWh and are accurate to the best of Think Energy's knowledge as of the date that the rate sheet was prepared. However, utility supply rates are subject to change periodically, and may differ based on usage, rate class, bill timing, and other factors. For this reason, the rate differentials shown above are preliminary and for illustrative purposes only, and neither Think Energy nor its advisors are able to provide any guarantees of savings amounts or percentages.
